Tributes to the Memory of Dr. B. W. Taylor.

The Board of Regents wish to record their tribute to the memory of their late fellow-member and President, Dr. Benjamin Walter Taylor, of Columbia. Coming from a family long identified with the interests of the Hospital for the Insane, it may be claimed that he not only carried on the best traditions and purposes of its founders, but by his counsel and service actively promoted its progress and development. At his birth, February 28th, 1834, the institution was yet in its infancy, having been opened to patients but six years. His father, B. F. Taylor, Esq., was elected by the Legislature to the first Board of Regents. His uncle, Major Thomas Taylor, Jr., was one of the original Commissioners, and his grand-father, Colonel Thomas Taylor, of the Revolution, is said to have given land to the institution. A cousin, A. R. Taylor, Esq., served also on the Board at an early period. Besides these, several others of his kinsmen at different times have been Regents.

Dr. Taylor's personal service began in 1877, when Governor Hampton deferred to him the reorganization of the Asylum, as it was then called. To him was entrusted by the Governor the selection of the new Board. From the date of the first meeting of that Board, July 5th, 1877, to his death, December 27th, 1905, Dr. Taylor continued an active member of our Board. He became its President September 13th, 1888, and was again chosen President upon the reorganization of the Board as at present constituted, March 10th, 1892. It is thus shown that for over twenty-eight years Dr. Taylor was an honored member of our Board. His interest, zeal and fidelity in promoting the welfare of the Hospital are attested by the few absences recorded against him from our meetings in this long period of service.

To comment upon his virtue, to dwell upon his example, to record our grief at his departure from our midst would, at this time and place, be but feeble and perfunctory. Our Board, in recognition of the value of Dr. Taylor's services to the institution, gave his name to the pavilion ward to white men several years ago. This act records our appreciation of him as a man, as a physician, as our fellow-worker and as our presiding officer. May the "Taylor Building" long remain as a memorial to the benefactors of our institution

through three generations, and the last of these we feel assured was not the least worthy, representative.

Whereas, it has pleased God to remove from our midst our beloved and honored brother member, and President, Dr. Benjamin Walter Taylor, after a service of nearly thirty years on the Board of Regents of the Hospital for the Insane of South Carolina. Therefore, to show our deep respect and sincere regard for his memory, be it

Resolved, That in the death of Dr. Benjamin Walter Taylor, which sad event occurred on the 27th December, 1905, South Carolina has lost one of her purest and noblest citizens. His record as Christian, citizen, physician and neighbor, will be cherished by all who knew him, and his death mourned throughout his native State.

Resolved, That the Board of Regents of the Hospital for the Insane of South Carolina deeply deplore his loss, and realize that the Board has lost its ablest member and adviser. His intimate knowledge of the conditions and problems, which the Board had to meet and solve was of incalculable value in the administration of its affairs. His plain, simple, gentle manners, and cheerful disposition, carried sunshine wherever he went, and marked him one of nature's grandest noblemen. His life was a strenuous one, but he held out to the end endeavoring to relieve the afflicted who sought his aid.

Resolved, That a page in our minute book be suitably inscribed to his memory and a copy of the proceedings be sent by the Secretary to his bereaved family, with the condolence of the Board, which mourns with them, their great and irreparable loss.

Under the shelter of his home, on the soil of his birth, in the love of kindred and friends, Dr. Benjamin Walter Taylor went to his reward December 27th, 1905. He was the embodiment of the gentler graces. In him there was a charity as white and calm as the moon-light shedding its rays on the mantle of night. In him there was a modesty as sweet and beautiful as a blushing maiden. In him there was a courtesy that drew him to men, and drew out of them their best. In him there was a patriotism that knew no fear and shirked no duty. Possibly his crowning virtue was his ever readiness to relieve pain whether on the field of battle amidst shot and shell, or in the silent retreat of the sick chambers of his native city. As a citizen he was patriotic and loyal. As a soldier he was brave and true. As a physician he was sympathetic and skillful. As a friend he was devoted and faithful. He knew both how to serve and to rule, for in his service he was as obedient as a servant and in au-

thority as royal as a king. He was both great and good—good in his greatness and great in his goodness.

In his death, the entire State has sustained a great loss, but none feels it more keenly than the Board of Regents of the S. C. Hospital for the Insane, of which he was a member for 28 years, and at his death was its honored President. Therefore,

Resolved, That in his removal by death the State has lost a skillful physician, a loyal citizen, and a cultured gentleman.

Resolved, That the Board of Regents had lost a wise counsellor, a congenial co-laborer, an efficient officer, and a faithful friend. held in loving remembrance and cherished as a precious legacy.

Resolved, That we express our profound sympathy to the relatives and friends of the deceased, and commend them to the sustaining grace of the God of all comfort.

Resolved, That a page in our minute book be inscribed to his memory, and that copies of this preamble and resolutions be fur-

Resolved, That his services to the Hospital for the Insane will be nished to his family and to the Columbia papers for publication, and included in our annual report.

W. J. GOODING,
IREDELL JONES,
J. W. BABCOCK,
Committee.

Mr. Glenn's comments:

Personally I knew very little of Dr. Taylor, except as a member of this Board, but from what I've seen of him here and what I have heard about him we regarded him as a man of strong convictions, of great energy and perseverance, in other words, a gentlemen of the highest type of noble manhood.

Dr. Taylor was a good farmer as well as a good doctor. Very often he would make suggestions to the Farm Committee, which were of great service to us as a member of this Committee, and which was highly appreciated.

There was one thing that impressed me forcibly in attending his funeral services. We noticed on the casket a cross made up and presented by the attendants of this institution, thus showing the high esteem in which he was held by the employees here. The fact that other wreaths more costly, perhaps, were left off the casket and this cross placed there, goes to show how much the family of the deceased appreciated this humble token of respect and reverence.

Dr. Taylor will be greatly missed by this Board, and his place here and in the city of Columbia, more especially, will be hard to fill.

Mr. Bunch's Comments:

Mr. President and Gentlemen of the Board of Regents:

This call of yours, being to my knowledge unknown before in a meeting here, takes me completely by surprise. I, however, appreciate being accorded the privilege of adding my testimony to that of your members of expressing myself in regard to our deceased President.

Before I left my home in Edgefield County to accept the position that I now hold here, my uncles, who followed the fortunes of war under the matchless leadership of General Hampton (they were in Hampton's Legion in those times that tried men's souls) asked me to hunt up Dr. B. W. Taylor, their army surgeon, in whom I would find the highest type of true manhood. To my surprise and delight after arriving in Columbia, I learned that these old veteran's friend and surgeon was President of your Board. He, by virtue of his office, and I, in discharge of the duties of my position, were necessarily frequently thrown together. He, as you all know, had a very large and lucrative practice, which required his time and his constant attention. Under the laws at that time a greater part of the work of the institution must be submitted to the President, and all legal papers and checks had to be signed by him. In looking back over these nearly fifteen years of our business relationship, I cannot recall a single instance when Dr. Taylor did not willingly lay aside the pressing demands of his business, and even of his profession, and give preference of consultation to the representatives of the State Hospital. Taking the good advice of my kinsmen, who had known Dr. Taylor in the Confederate Army, we selected him as our family physician. Through this means we got a deeper insight into the life of this good man than would have been possible even with our constant contact in business transactions. We found here a man who was untiring in his efforts to relieve distress, and one that was withall as sympathetic and gentle in his nature as a child. As a friend he was unassuming, but most loyal. As such I am sure that he contributed very greatly to the pleasant relationship existing between ourselves and the citizens of the city of our adoption.

He shrunk from any relation to things that would in any way bring his own deeds into prominence, but to our knowledge he was to the end untiring in his efforts to relieve the ills and misfortunes of his fellow-men; and we happen to know of instances where he,

without solicitation advanced the interest of young men in their struggles to gain a foothold in their business or professional ventures. This all being true, is it any wonder that Dr. Taylor made friends in all conditions and classes of men? He was truly and naturally loved by the veterans. His business career was free from stain. His official life was self-sacrificing and pure. His sympathetic nature and his conscientious desire to discharge his whole duty endeared him to all who had ever been under his professional care. His friendship was sincere and true, and his thoughtfulness for others less fortunate than himself were marked characteristics of the life of Dr. Taylor, "God's true nobleman," our best friend.

Dr. Ray's copy.

Mr. President: It is a beautiful custom to memorialize the dead, and more beautiful on this occasion as we have such an illustrious character to memorialize. When we honor such men, we honor ourselves. To have known Dr. Taylor was a great privilege. To have been associated with him was ennobling. His life was a lesson to us all. His career was a proud one, worthy to be emulated. He lived but his allotted life in the home of his birth. He fulfilled every expectation of his friends. He nobly performed every duty assigned to him, whether in peace or in war. He won the admiration of all by his manly, honest, straightforward dealings with his fellowman. It was a great pleasure to see him driving the streets of Columbia. While we will see him no more on earth, it is a great satisfaction to feel that as he answered his last call, he was greeted with "Well done thou good and faithful servant, enter thou into everlasting life."

REPORT OF THE REGENTS.

To his Excellency D. C. Heyward, Governor of South Carolina.

Sir: The Board of Regents submit their 82d annual report to your Excellency, together with the reports of the Superintendent and Treasurer, as well as the usual statistical tables, vouchers, &c.

To our disappointment, the growth of the Hospital and the demands made upon it continue to exceed the limitations of the institution both as to accommodations and means of support. Besides the insane, for whom the institution is intended, the other classes of defectives—idiots, epileptics, inebriates, dotards and homeless and friendless individuals—are still forced upon us. For these seeming abuses there seems to be no redress until the State provides adequate accommodation elsewhere. Meanwhile, the result is that we have a conglomerate institution, which serves as the receptacle for the undesirable members of all communities of our State.

Our Board apprehends that at no distant day the institution as at present constituted will not meet the demands upon it. So far as we can outline a policy for the future it would include the present buildings and grounds as a central reception hospital. Here could be received the more acute cases of insanity. But the chronic cases as well as epileptics and other classes of nervous diseases could be distributed in farm colonies elsewhere. The lands now held in the Hospital tract are too valuable for merely farming purposes. A large part of the tract was purchased chiefly because it presented such natural advantages for a large hospital on the pavilion plan. It is a question whether the State should not buy near Columbia a farm large enough to supply not only the site for some of the colonies above mentioned, but also to supply farm and garden products in abundance for the institution. We do not hesitate to say that the time has arrived for a careful consideration of this proposition.

Soon after the adjournment of the last session of the General Assembly the Board of Regents learned that the small tract of land at the corner of Lumber and Barnwell streets, owned by Hugh Weir, could be bought at a much less sum than had previously been asked. The matter was referred to the Chairman of the Hospital Committee in the House of Representatives, and his acquiescence obtained before the purchase was made upon the precedents of the purchase of

the Jones and Seegers land. We were all the more willing to undertake the purchase of this land at that particular time, as it will enable the Hospital to close all thoroughfares between Bull street and the Southern Railway. The subsequent death of the owner and the rapid advance in the price of adjoining land has furthermore confirmed the wisdom of our decision to secure the land while it was upon the market, without waiting for Legislative sanction.

The reception of non-residents into the Hospital is another problem which has not been satisfactorily adjusted. In discussing this question with a Commission from North Carolina our Committee endeavored to come to some definite agreement and lay down principles for our government in the future. These general principles were agreed to by the two Committees, but we have no information that the several institutions of North Carolina have agreed to them, nor has an official copy been submitted to us for ratification. This is matter of regret, for the problem of settlement is one of growing importance with us in the changing population of many parts of our State. It is most important that the individual should not suffer because his case does not come under the laws of a great State or conflicts with them.

The problem of the inebriate is one that requires special attention. In former reports we have dwelt upon the fact that the association of inebriates with the insane was bad for both. The time has arrived when we feel that the State should make special provision for this class of patients.

A recent authority has summed up the situation in these words:

"Public policy in regard to the treatment of habitual drunkards is by no means clear and consistent. The drunkard is a sick man, in the eyes of physicians, yet the hospitals are not prepared to give adequate treatment. Alienists recognize brain disorder, but the asylums for the insane cannot, for legal and financial reasons, retain a drunkard after he is sober enough to walk away. Inebriates are very liable to commit crime and are generally dangerous to public order and comfort, but they cannot be treated as criminals unless they actually commit some offense, and then a prison gives little promise of healing their disease or restoring them to moral uprightness. The medical profession seems to be in agreement that habitual drunkards, to be permanently cured must in many instances, be placed under restraint and held under control for two to four years, until the poison is eliminated from the body and a new life is built up. For

this treatment very little preparation has been made in the United States."

It is largely through the funds arising from pay patients that the Regents have been enabled, from time to time, to add to the Hospital lands and grounds. As long ago as 185 , Dr. LaBorde showed that the income from pay patients contributed 50 per cent. of the expenses of beneficiaries.

The Dix Fund—a fund derived from private subscriptions in the early '70s—was the entering wedge in acquiring, in 1896, the now valuable Wallace estate for \$27,000. Of late through the pay patients' fund the Regents have been permitted to secure the Jones, Seegers and Weir land adjoining the Hospital grounds on the east. The pay patients' fund in one sense is our contingent fund. All appropriations from the General Assembly are for specific purposes and cannot be applied to other than their original purpose. Emergencies are bound to arise for which the General Assembly cannot provide, and while the pay patients' fund is usually applied to support, yet it has been used as an emergency fund also, when occasion arose.

A tabulation of the relative expenses over a series of years is both interesting and instructive:

Year	Total Patients.	Daily Number.	Total Expenses.	Per Capita.
1875.....	428	812	\$ 83,182 00	\$210 40
1880.....	541	897	84,000 00	214 04
1885.....	914	593	136,977 00	146 34
1890.....	1,014	754	100,744 00	131 05
1895.....	1,157	827	123,332 00	115 76
1900.....	1,461	1,043	127,181 00	102 71
1901.....	1,493	1,068	135,816 00	103 00
1902.....	1,611	1,134	157,870 00	101 32
1903.....	1,641	1,155	153,337 91	105 06
1904.....	1,736	1,210	162,643 36	102 39
1905.....	1,734	1,250	176,708 82	103 04

A comparison of the general expenses of other States for the support of their insane hospitals and insane for the last two years is of interest in this respect:

	1904.	1905.
Virginia	\$345,000	\$383,000
North Carolina	259,000	357,000
Georgia	325,000	337,000
Florida	85,000	140,000
Kentucky	449,407	465,613
Alabama	191,449	219,000

Alabama allows a per capita of not more than \$2.50 per week, and Tennessee an annual per capita of \$135.00. The per capita of the Georgia State Sanitarium for 1905 was \$121.79, with a daily average

of 2,880 patients; while in the Government Hospital for the Insane, at Washington, it was \$220, with a daily average of 2,660 patients.

Our Board has looked carefully into the matter of our expenses as compared with similar institutions elsewhere. The appended tables will give others an opportunity to do the same. We do not well see how our institution's expenses can further be reduced.

The matter of a deficit is fully explained in the Superintendent's report. For the coming year our financial needs will be:

For support	\$140,000 00
Improvements and repairs.....	15,000 00
Refrigerating plant	1,500 00
Regents	1,200 00
Deficit for 1905.....	19,477 02

The employment of a dentist for the Hospital has been called to our attention. In the opinion of the Board there are other more pressing needs. But we refer the matter to the General Assembly as requested.

Commending our charge to your Excellency and the General Assembly, we remain,

Very respectfully,

W. J. GOODING, President.

IREDELL JONES, Vice-President.

J. PERRY GLENN,

W. W. RAY, M. D.,

J. H. TAYLOR, M. D.

SUPERINTENDENT'S REPORT.

To the Board of Regents.

Gentlemen: I have the honor to present herewith the eighty-second annual report of the State Hospital for the Insane, for the year ending December 31, 1905.

The examination of the accompanying tables, both statistical and financial, will show that we have had an eventful year. The number of applications for the admission of patients was 565; the number received was 521; the total number under care 1,734, and the daily average number 1,250.

The total number of admissions since the opening of the Hospital is 12,128, of whom 8,710 have been received since 1880, and 6,419 have been admitted since 1890. This means that more patients have been received in the last fifteen years than were admitted in the previous 62 years, or to put it in another way, we now receive in two years a thousand patients, whereas it formerly took nearly 30 years to bring this number to our doors.

The Hospital as it stands to-day is the result of the aspirations and efforts of many minds for nearly a century. So far as known it began with Samuel Farrow in 1813. Its growth was slow from its foundation in 1821 down to 1880. The error of locating such an institution within a city had long been recognized. The acquisition of adjoining property has been felt as an actual necessity since 1880. Consequently, the Wigg, Black, Parker, Wallace, Jones, Seegers and Weir tracts have been obtained as they came upon the market. As a result the State now owns here about 360 acres. Of this amount 60 acres are used for buildings, exercise grounds, &c.; the remaining 300 acres, for farming.

No one can say what the future may demand of the institution. But the experience of the last 15 years teaches us that the demands will probably be greater than ever. It would seem to be the policy of South Carolina to maintain here in Columbia upon her present holdings a large central colony for the insane proper and such other acute cases as may be sent here. I am sure that this central hospital idea deserves more attention than it has yet received. But equally important is the proposition frequently made in previous reports to have elsewhere in the State colonies or farms for epileptics, inebri-

ates, feeble-minded children and old people, or dotards, as they are called.

It avails little to place these propositions annually upon these reports to the General Assembly, and permit the matter to end there. The time has come for our State to begin the separation of these classes of defectives. Other States, Virginia and Texas, for example, are making separate provision for the epileptics. In my last report it was stated: "Of recent years we have been receiving on an average about 25 idiots and imbeciles, about 50 epileptics and 25 inebriates. It is most unfortunate for all concerned that these classes should be associated in our over-crowded wards with the insane. A wiser policy would be to separate them in different institutions, or if that appears a too expensive method, at least to give them separate wards on the Bellevue Place or elsewhere. The epileptics, at any rate, should have a separate colony in the country. When the finances of the State permit, it is devoutly to be hoped that these important questions may be taken up and solved according to the enlightened methods pursued by other States."

In reiterating these facts, I most urgently appeal to you and through you to the General Assembly, to take the necessary steps towards again placing our State in the van where she once stood in making provision for her unfortunate children. That something more worthy be done for our epileptics and inebriates is a crying need.

If the County Commissioners of the several Counties could be prevailed upon to establish not only hospitals, but also, homes for old people in connection with their alms houses, this institution would be relieved of the care of many dotards now sent here for want of other or adequate provision.

IMPROVEMENTS.

The extension of Lumber street to Harden has been carried on so far as rested with us. There appears to have been unreasonable delay on the part of the Southern Railway in completing the iron bridge at Laurens street. Whenever this is done we will endeavor to complete our part of the agreement.

✓ The purchase of the Weir lot at the corner of Barnwell and Lumber streets, completes the Hospital line on the south from Bull street to the Southern Railway track. The purchase price was \$2,250. A cash payment was made of \$250 and a mortgage of \$2,000 placed upon the property at six per cent. interest, with the agreement to pay \$500 annually till the mortgage is paid off. ✓

With the new policy of killing our own beef it was found necessary to install a cold storage plant at the cost of about \$1,000.

The erection of two sanitary towers at the Old Building at an estimated cost of \$2,400, and of a large silo at the dairy, at the estimated cost of \$1,000, were deemed necessary improvements during the past year and already we are receiving the benefits expected from these important additions.

The institution has for some years suffered harm from the entrance of surface water from Bull street into the front yard. At the cost of \$836.14 provision has been made for carrying this water down the western side of the extension of Bull street from Elmwood avenue.

INSURANCE.

With the appropriation of \$6,000 by the last General Assembly for that purpose, insurance to the amount of \$280,000 has been placed upon the buildings, &c., for three years beginning March 1, 1905. For the previous term of three years for the same amount we had insurance for only \$237,000. The companies decided that in view of the better protection we now had from the ten-inch water main about the institution to restore the former total amount of insurance.

Experience here and elsewhere teaches that we are in great danger from fire. Adequate insurance is a part of the problem only. The effort must be constantly made to protect the patients and property from this danger by adopting the very best means for preventing its occurrence. Our fire apparatus is in need of renewal and extension.

FINANCIAL.

In considering the finances of the Hospital it is well to keep in view that during the last 30 years while the population, both daily average and total, has increased four-fold, the appropriation has only doubled and the per capita has diminished one-half. Meanwhile, the price of food stuffs and supplies has increased on an average 25 per cent. For several years it has been duly set forth in these reports that our appropriations have not kept pace with the growth and needs of the Hospital.

Last year's estimate for support was \$130,000; the actual amount expended was \$128,795.58, but the appropriation was only \$125,000. It has been found necessary to include for extraordinary improvements and expenses these items:

Improvements on North Bull street.....	\$ 836 14
Extra supply of coal.....	3,582 85
New silo (estimated).....	1,000 00
Sanitary towers, Old Building.....	2,400 00
Extra insurance above appropriation.....	513 10
Mules and horses	1,065 00

Improvements on farm:

Drainage, &c.....	\$1,380
Stables, &c.	1,000
Cementing stalls	500
	<hr/>
	2,880 00
	<hr/>
Total..	\$12,277 09

The amount that it was found necessary to expend for buildings and repairs over and above the appropriation was \$16,437.29. The amount spent for support above appropriatoons was \$3,795.58. It is for these reasons that I have to report a deficit this year \$19,477.02. It was clear in July that we should not be able to maintain the institution with available funds. It was, of course, possible to refuse to admit patients and stop all work upon buildings. Upon consultation, it was decided by your Board to limi tthe deficit so far as possible by cutting off all unnecessary expenses, without refusing patients. This has been the policy pursued.

The total amount actually expended for support was \$128,795.58. This amount, divided by the daily average number of patients, 1,250, gives the per capita of \$103.04. This is sixty-five cents over the per capita of last year.

After careful consideration, your Board has decided to ask for appropriations for next year:

Support..	\$140,000 00
Improvements and repairs	15,000 00
Refrigerating plant	1,500 00
Regents	1,200 00
Deficit	19,477 02

These estimates are made upon as narrow a margin as possible. I do not myself believe that the item of support can be kept under \$140,000. On the contrary, I believe it will exceed that amount, if the number of patients continues to increase, and the prices of pro-

visions remain as at present. The item of fire protection, also, should not be overlooked.

My appreciation of the co-operation and support of your Board, individually and collectively, need not be dwelt upon here, beyond its grateful acknowledgment on behalf of my associates and myself.

J. W. BABCOCK,
Physician and Superintendent.

GENERAL FINANCIAL STATEMENT, 1905.

DISBURSEMENTS.

Total disbursements, 1905.....		\$176,708 82
